**Subject:** Modifying the onset detection program-Oct 1-7

**Description:** Continued to work on the new onset detection program, working through pseudo code for the changes that need to take place in the program. Again, fixing the error with the 1st sec of sound, ignoring sound mex pro injected sound, and optimizing the code to run repeatedly.

Sunday Oct 1, Met with Ali and started working on the test space for our sample point database. We picked out it's location, finalized the design and supplies that we would need to build it next week. We also communicated with everyone in the group about what they needed to bring on monday when we start building the space.
