Subject: Weekly Report Oct 30- Nov 6

Description: Weekly Report for October 30 to November 6.

Last week we had the second mile stone meeting. It went well. In the past 2 weeks, we have built the database, finalized all coding related to filtering and onset of the sound, database code, and euclidean code.

The camera code is coming along well as well, we just have to stitch it with the rest of the code.

We did have problems with the euclidean distance though. We think it's the onset values or the actual database method. We have tried another method, its triliteration. With triliteration, we are getting some results, but it's not perfect.

Other data is present in my power point and part of the report. Please check it out.
